**Subject:** Re: Weyerhaeuser 23NOC1614 Status Update

Good afternoon,

I identified one additional item during my review that needs to be addressed in an addendum to your application:

The CDK VOC combustion emission factor was converted incorrectly to WPP1. Please review EPA's Interim VOC Measurement Protocol for the Wood Products Industry document, Section 8.0, Equation 1 (as referenced in your emission spreadsheet). The Method 25A VOC in the equation must be as propane, not as carbon.

In addition, you asked about our Executive Director's review of the draft Preliminary Determination if he is out of the office. He said he can review the draft Preliminary Determination concurrently with your review if it has been reviewed by the Compliance Manager and myself.

Please contact Aaron if you have any questions.

Have a great weekend!

**Subject:** Re: Weyerhaeuser 23NOC1614 Status Update

Good afternoon,

As you know, ORCAA consulted with EPA Region 10 on your proposed BACT determination, and we received draft comments back today (we will not receive official comments for a couple of weeks). We were going to wait to send these to you until I finished my review of the BACT determination, but Nancy Liang asked I forward them to you now so you could get started on addressing EPA's concerns. If I identify any additional concerns during my review, I will send those to you by the end of the week.

After you submit an addendum addressing these concerns (as well as the changes to emission factors you are considering), we will continue our review and prepare a draft Preliminary Determination based on the revised application. The draft will be reviewed internally and then we will send it to you for your review.

**Subject:** Weyerhaeuser 23NOC1614 Status Update

Hello. I wanted to give you a status update on your application for the continuous dry kiln project. As we discussed, I consulted with EPA Region 10 on the proposed BACT determination and they contacted us yesterday that they have comments on the project. EPA is currently

drafting their comments and while they couldn't definitively say when they would be done, based on our conversation I am hoping to have them within the next two weeks.

I'll forward their comments to you expeditiously when we receive them.

Sincerely,

Aaron Manley, P.E.
