**Subject:** RE: EPA Region 10 Comments on Weyerhaeuser Raymond CDK NOC Permit

Hi Zach- I tried to call this morning but it appears that you may be working remotely today. We received your comments and reviewed the referenced permits for Katerra/Mercer facility in Spokane and we have a follow-up question. Will you please share any technical reasoning and evidence for why control technologies are technically feasible, especially relating to wet scrubbers, WESPs, and downstream oxidation? The Katerra/Mercer facility in Spokane uses hoods or flaps that help reduce leakage and direct more exhaust upwards through the extraction modules, but they do not use add-on control devices. We are hoping to gain some insight into EPA's knowledge, especially if there are permits or technical guidance documents that you can direct us to regarding add-on controls.

Thanks Zach!

Hi Zach- Following up on our phone discussion, please connect me with the permitting lead in the Air Division. We'd like to check on when Region 10 plans to share their comments. If it helps, we can set up a Teams meeting, or in-person meeting to answer any questions and help expediate the process. We appreciate your help. Thanks!
