Aaron,

Just got confirmation that Weyerhaeuser is on-board with this scenario. Thanks for your help!

Subject: Re: Weyerhaeuser 23NOC1614 - Commissioning Question

Hi, Matt. We don't have any draft language to propose at this time. The condition will require the boiler and batch kilns not operate simultaneously with the CDK as well as monitoring and recordkeeping requirements to demonstrate they're not operating concurrently. The condition will also have a sunset clause, ending the requirement once the boiler and batch kilns are removed from the facility or made otherwise inoperable at the facility.

Regardless of how we word the condition, Weyerhaeuser will have an opportunity to comment and provide input on the draft before we send it over to Ecology as part of their Tier II analysis, and then again during the mandatory public commenting period.

Sincerely,

Aaron Manley, P.E.

Engineer II

Subject: Weyerhaeuser 23NOC1614 - Commissioning Question

Hi Aaron,

Request from the client: Can you send example permit language that would qualify the scenario we discussed? (batch kilns and HFB not operating simultaneously with the CDK nor after commissioning is done)

Thanks!
Matt
