

## **Form D – Insignificant Emission Unit Information for AOP Application**

List emission units or activities classified as insignificant for Title V purposes, based on the criteria listed in WAC 173-401-530. Attach additional pages as necessary. Designation of an emission unit or activity as insignificant for Title V purposes does not exempt the unit or activity from any applicable requirement. An emission unit or activity is insignificant based on one or more of the following reasons:

1. Actual emissions of all regulated air pollutants from a unit or activity are less than the emission thresholds established in subsection (4) of WAC 173-401-530.
2. It is listed in WAC 173-401-830 as categorically exempt.
3. It is listed in WAC 173-401-830 and is considered insignificant if its size or production rate based on maximum rated capacity is below the specified level.
4. It generates only fugitive emissions, as defined in ORCAA Rule 1.4, which are subject to no applicable requirement other than generally applicable requirements of the State Implementation Plan (SIP).

Please note that no emissions unit or activity subject to a federally enforceable applicable requirement (other than generally applicable requirements of the SIP) shall qualify as an insignificant emissions unit or activity. For the purposes of this determination, generally applicable requirements of the SIP are those federally enforceable requirements that apply universally to all emission units or activities without reference to specific types of emission units or activities.

IEU #	IEU Name	Basis for IEU Designation	If Exemption is Based on Emissions Being Less Than Stated Thresholds:		
			Pollutant Name	Emission Rate, tons/year	
				Threshold	Actual
